
about ACL rules

Posted by cimexbra - 2014/09/15 00:00

Hi,

:(I create a group "test de nivel" child of register users. My problem is: all register users can see and take the quizz. When I go to access levels ACL in categories show the next actions: Delete, Edit Quiz, Edit Quiz State, Create Question Category, Delete Question Category, Edit Question Category, Create a Question, Delete Question and Edit Question. Which one of these options (please see the attachment) I must to choose for only the users in the group "test de nivel" can see and take the quizz but not all register users? Thank you in advanced!

Hello,

See "Access" parameter in category settings:
