
Lost in all the options! Can't get Quiz to work

Posted by aningbo - 2014/09/18 22:52

I created Quiz Categories & Bank Categories. Proceeded to add a question in "Question Bank"

Now, I went to "Quizzes" and click on "New" to create a quiz which added successfully.

Now, the front-end shows the quiz but it won't proceed beyond "loading" and there's a lot of error being shown:

```
JFile: :read: Unable to open file: /var/www/master/components/com_ariquiz/assets/js/yui.combo.js?v=3.6.15
JFile: :read: Unable to open file: /var/www/master/components/com_ariquiz/assets/js/ari.all.js?v=3.6.15

JFile: :read: Unable to open file: /var/www/master/components/com_ariquiz/assets/js/touch_fix.js?v=3.6.15
```

I'm unable to get the quiz working :(

This is suppose to be easy but its just confusing and not working!! Is there any video tutorial or could you create a sample working quiz?

Hello,

It seems javascript files which is used by the extension were not installed or have an incorrect files permissions. Check .js files in /components/com_ariquiz/assets/js/ folder (see file permissions to 775 for example).

PS: We can investigate the problem in more details if you provide a temporary access to your J! backend by email.

ARI Soft
