
Upgrading Ari Quiz from Joomla 2.5 to Joomla 3.x

Posted by eugenio - 2014/10/09 08:22

Hi there.

I'm running 'ARI Quiz v. 3.3.4' into a joomla 2.5.8 website and planning to migrate the website to joomla 3.x

Questions:

- 1) Is 'Ari Quiz 3.3.4' joomla 3.x compatible?
 - 2) How can I upgrade 'ARI Quiz 3.3.4' to 3.6.12 or latest version?
- =====

Hello,

1. If you want to use the extension with the latest Joomla! version, upgrade the extension to the latest version.
2. Install a new version of the extension via standard Joomla! installation. The installer upgrades the previous version to the new version.

Regards,
ARI Soft
