
Manually delete result data

Posted by mrrizal - 2014/10/13 04:51

Hi

I am not an expert programmer, may i know how to delete result with success status thru database?

Hello,

Use the following SQL query:

```
DELETE
  SI,S,P,SF,SED
FROM
  #__arquizstatisticsinfo SI LEFT JOIN #__arquizstatistics S
    ON SI.StatisticsInfold = S.StatisticsInfold
  LEFT JOIN #__arquizstatistics_pages P
    ON SI.StatisticsInfold = P.StatisticsInfold
  LEFT JOIN #__arquizstatistics_files SF
    ON S.StatisticsId = SF.StatisticsId
  LEFT JOIN #__arquiz_statistics_extradata SED
    ON SED.StatisticsInfold = SI.StatisticsInfold
WHERE
  SI.Status = "Finished" AND SI.Passed = 1
```

Another question with deleting data, can we delete #__arquizstatisticsinfo.Status with "Process" via Joomla Backend Panel?

I limited my user to take quiz for 1 hour and only 1 attempt.

Some of my data #__ariquizstatisticsinfo.EndDate is NULL and StartDate is already past 1 hour, and Status is Process.

The extension doesn't support ability to delete active quiz sessions.

That mean whatever Status=Process is active?
My user still cannot enter the quiz because time is set for 1 hour and already passed.
Or can we reset the user to take the quiz?
Or I have to reset by manually delete the data in table?

Could you provide a link to a quiz where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem?
