ARI Quiz doesn\'t work

Posted by sriva - 2014/10/24 20:42

_____

Hi,

I installed the latest version on my local server and I can't get it to work.
I think everything is properly configured, but the continue bottom seems not to work.
I will provide you backend access by mail.

Stefan

_____

Hello,

Could you describe in more details what exactly doesn't work (backend part or frontend, link to a page where we can see the problem)?

Regards,
ARI Soft

_____

Hi,

the econtinue button doesn't work. When you click it nothing happens.
I have sent you the login data already by mail.

Stefan

_____

Hello,

Try now please. It was a problem with configuration of "iconv" PHP extension and we updated
/components/com_ariquiz/router/router_ariquiz.php file.

Regards,
ARI Soft

_____

Hi,

it works fine now. Thanks for your quick support.
Is the problem now also solved for future installations?

Stefan

_____

You can copy the modified router_ariquiz.php file from your server to your computer and use it if the problem will occur with new versions of the extension.

Regards,
ARI Soft
