## Math Tax Plugin

Posted by enginbasturk61 - 2014/10/26 06:08

---

Hi...

I wanted to use math plugin on my website...

there are three different parameters

$$\left( 7+\frac{1}{3} \right)\div \left( 4+\frac{1}{3} \right)=?$$

$$\left( 7+\frac{1}{3} \right)\div \left( 4+\frac{1}{3} \right)=?$$

$$\left( 7+\frac{1}{3} \right)\div \left( 4+\frac{1}{3} \right)=?$$

I want the formulae to be inline in the question area... so I think I should use the third one for that but the appearance of the formula wont be same...

See the result in the attached pic...

First and second are good at appearance but fixed in the center (blocked). The last one is inline but numbers are not in same size... appearance isn't good.

How can I have this formula 
$$\left( 7+\frac{1}{3} \right)\div \left( 4+\frac{1}{3} \right)=?$$
 as inline with a good appearance

=====

Hello,

Variant #3 is used to embed inline math expressions. You can read about it [here](#). If you want to increase font size, add the following CSS rule to a site template CSS file:

BODY .MathJax {font-size: 20px;}

If it doesn't help, provide a link to a quiz where we can see the problem.

Regards,
