
Remaining time on Ari Quiz lite not responding

Posted by bigassmo - 2014/10/30 22:27

I like what I see so far in Ari Quiz Lite. I have found everything I needed to do on my own without reading much documentation. I wanted to make the question times longer than 10 seconds, and I can easily change the entire quiz length, but question length is not responding to any changes in the number, from 0 to 1500 there has not been any difference. It is always 10 seconds long. I cleared cache and expired cache.

What are your thoughts?

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

I have the same problem. Quiz times out too quick.

What was the problem/solution?

Hello,

Check "Total time" and "Question time limit" parameter in quiz settings and "Question time limit" parameter in question categories settings. Then complete previous quiz session and start a new one.
