
Ar1 Quiz Text Template

Posted by aksoy - 2014/11/07 14:19

hi,
i decide to give a printable certifica after my quiz and open a text template. first of all, i use img take to logo and other issue but i couldnt put the name and other things on the image. then i create a table and use background image and put name passed value on background img. all things okey certifica and background image can see in the result page but when i try to print certifica, background image lost

pls help me to the create good certifica.

thx a lot

Hello,

Most modern browsers don't print background images by default. You can read about it [here](#).

I created a custom field on the log-in form and wanted to add this to the certificate.
I sent an email to tech about a week ago but no reply. Anybody have any idea how this is done?

We sent the answer by email. Check your spam and junk boxes.

If you want to add a new parameter to text templates, it requires modification of the extension.
