Good day,

I am planing to build a mobile app to connect to ARI Quiz. Do you have such an API/Web service to handle such? if yes,provide documentation for this. if no, what is the alternative?

Thanks for your anticipated co-operation

Hello,

The extension doesn't provide this web service or API. Currently it is only supports ability to subscribe to such events like end quiz, start quiz, resume quiz, stop quiz and etc.

Create a system plugin or a web service which will provide the required methods.
