
Warning

Hello.

After installation AriQuiz v.3.6.16 saw this message:

"Warning: ignore_user_abort() has been disabled for security reasons in
/home/znakivxm/domains/znaki.vxm.pl/public_html/tmp/install_547dbe4eed57/backend/kernel/Install/class.Installer.php
on line 65"

Do I need to do anything?

Regards
