## Images will not show

Posted by bmcguire - 2008/11/25 02:51

---

New Install

I can't get images to show up.

I have read the forum and have tried to place a "/" in front of images/phishing/image1.jpg

When I update the "/" is dropped off.

Please advise.

Also how do I access the Help file???

I am on a Mac and it seems to be a .chm file when I unzip it.

Bryan

It looks like the WYSIWYG editor you use cuts down "/" symbol for some reason. Could you turn off the editor temporary and change image paths as appropriate to contain leading "/". This should help.

If you on a Mac you can use appropriate CHM viewers like Chmox or xCHM.
