## Translate ...

Posted by Igiraud - 2014/12/13 13:31

---

Hello,

Sorry, my english is bad ...

I can not translate on the frontend of words in French

for example I would replace Correct answer by R  ponse correcte ...

Many thanks in advance

Hello,

You can read here how to create a new translation or edit existing one. The following language files are used for frontend part:

/language/en-GB/en-GB.com\_ariquiz.ini

/language/en-GB/en-GB.com\_ariquiz.ajax.ini

Regards,

ARI Soft

I 's not ok

I send you one of these sheets ...

It's possible ?

Thanks

All labels for fronted are located in files which you specified in our previous post. It also contains the link to the page in documentation where is described how to create a new translation or edit existing one.

Could you specify what did you do and what doesn't work?

Regards,

ARI Soft

Hello ,

In fact I manage to translate a lot of words, but rather in the backend , that said I do not manage to correct choice in the case of multiple correct answer and questions and answer incorrrecte

---

A link where you can see:  
<http://casedesmaths.net/le-coin-des-ts/qcm>

Many thanks in advance

I just understand how to use locate !  
Thank you very much ...  
I still can not translate after validation of QCM  
"THE ANSWER IS WRONG "  
"THE ANSWER IS CORRECT "  
" Correct answer " and " Your answer"

thank you

See the following label in /language/en-GB/en-GB.com\_arquiz.ini file:

COM\_ARQUIZ\_ACCESSERROR\_LAGTIME="You can not take the quiz because lag time has not been elapsed"
