
Chart Module

Posted by sumerraj - 2015/01/19 06:48

Hello all i would like to buy ARI Quiz but i also want to show a chart to student so he can know his growth in graphical chart
for eg like Plotalot
is there any module for that or is there any other way to do that so i can easily take may decision for buying

Hello,

That extension doesn't this type of module. Could you specify what exact information you want to show on a chart (if possible send an image)? Probably it is possible to show it with help of "ARI Data Tables" extension if not then it can be implemented as a custom development.

Regards,
ARI Soft

given chart visuals can be customize accordingly

for eg if admin wants he can shape the user growth using line chart
so student can easily see his growth using visual chart module

Hi,

I'd like to open this topic again.

So, I have ariQuiz on my website and I want to plot a chart on the quiz result so that my students will see his recent result or his improvement progress.

Also the teacher can see the average score of their student for one specific quiz.

I am imagining that the chart will be like a radar chart alike for the student. And bar chart for the teacher.

see attached picture as an example, where the series will be the subjects e.g. math, english, biology etc.

Could you please support for the solution how to access the result database? or if there is any additional extension that can grab it automatically?

Thanks. http://www.ari-soft.com/images/fbfiles/images/Screen_Shot_2016_11_03_at_20.png

Hello,

The extension doesn't support ability to create these charts, it requires a custom solution.

Hi,

thanks for your reply.

Could you support on how to query the quiz result data like on the ariQuiz result page? I am having difficulty to locate the result database.

As an example, user x wants to have the past quiz score of y.

Thanks.
