Hi,

Some users bring to my attention problem on my website. When they taking quiz with time, sometimes before the clock finish the quiz is finish. For example they have 5 or 10 more minutes on the quiz clock but the quiz show the finish screen. Can you tell me how the clock is working and what can be the problem?

Thanks

my version is ARI Quiz v. 3.6.16

Hello,

Could you provide exact steps how to reproduce the problem or specify what settings are used in a quiz so we can try to reproduce the problem on our test server? You can send this data by email.

Regards,
ARI Soft
