
How delete this DIV? where i can found it?

Posted by modusoperandi - 2015/04/22 09:54

Hi,
i need to hide or delete this div.
when user answer the question i dont wanna see again the question but only the message about if it correct or not and the explanation. <http://www.ari-soft.com/images/fbfiles/images/div.png>

If you want to delete answers on quiz results page, add the following CSS rule to a site template file and clean browser's cache:

```
#dtResults .aq-question-answers {display:none;}
```

Regards,
ARI Soft

thanx but seem wont working.
i added that rule in template.css of my template (protostar),
i deleted cache n refresh many times but i still have the questions when the system show me the correct answer

Could you send a link to quiz results page where the problem occurs?

Regards,
ARI Soft

Sorry for the delay. We provided the CSS rule which is used to hide unnecessary part of questions content on quiz results page. If you want to hide it on explanation page which is appeared immediately after a user answer, use the following CSS rule:

```
.aq-show-explanation .aq-question-answers {display:none;}
```

Regards,
ARI Soft
