Hello, I would think the circle to tick the right answer would be next to the question and not below as on the image attached. Any idea how I can fix that easy? I am not a developer:) http://www.ari-soft.com/images/fbfiles/images/27_4_2015_18_52_43.jpg

Hello,
It can be a conflict with site template styles. Could you provide a link to a quiz where the problem occurs?
Regards, ARI Soft

Hi, sorry for the late reply - Should update my email address
Here is the link to a test quiz www.ronanparkefans.com/quiz.html
Re:Layout problem Posted by admin - 2015/05/08 11:32
Hello,
It is a conflict with site template styles. Add the following CSS rules to a site template CSS file:
#ariQuizContainer .aq-answer-container .aq-answer-label LABEL {padding-right:0;} #ariQuizContainer a.btn {height:auto;}
Regards, ARI Soft
Re:Layout problem Posted by robemo - 2015/05/08 11:38
Thank you - That fixed it
