
Design templates

Posted by andrej - 2015/05/06 09:04

Hello
I'm using version 3.7.5 of ARI Quiz.
I wanted to ask, how to hide buttons - scan "q2"
The second question - how do I make the questions were one above the other - without this break - scan "q1"

Best regards
Andrzej <http://www.ari-soft.com/images/fbfiles/images/q2.jpg>

Hello,

1. Set "Results settings -> Share results" parameter to "No" and "Results settings -> Certificate failed template" parameter to "- None -" value in quiz settings.
2. It seems this is a problem with HTML formatting and CSS styles which are used into the question. Where we can see the problem?

Regards,
ARI Soft

So I set - Something is not right.
I sent an e-mail from accessing the site

Regards
Andrzej
