
Access by user group not working

Posted by Fontcept Graphix - 2015/05/07 14:20

I am using Joomla 3.4.1 and Ari Quiz 3.7.6

I have set the access level for both categories and actual quizzes using the access drop down in the Access and Security tab. I select a specific group but from the front end all quizzes are accessible to non logged-in users.

I need to prevent access to certain quizzes while making others accessible to all.

Is this a bug or am I missing something?

Hello,

Could you provide a link to a quiz where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

This problem with configuration of access levels. "Public" user groups is included into access levels.
