
Parse Plugin in Text Template

Posted by DomJam - 2015/05/19 13:39

Hi Team

I am still working on improving things in my Quizz site.
I'll get back to you on the special Sharing Extended plugin later today.

For now I have a question : is it possible to have the 'Parse Plugin' option working also in the 'Text Template' ?

In short : on the result pages I want to lock the content until the visitor make a share.
I have tried several plugin, and one of them is of great interest (JO SOCIAL CONTENT LOCKER) but if I place the required tags in Text template

eg:
{josociallocker}....{/josociallocker}

it is just displaying those tags as letters, it does not process it..
see: <http://www.test1.couleurweb.com/test-cerebral-3210/Results-bf5322c407baf7c36347c4e83a2dd351>

What can I do to have plugins working on pages results ?

Test website : <http://www.test1.couleurweb.com/>
You have access to the admin via the log and pass that I have provided before in case you want to check...

Many thanks in advance for your help !

Best
Dominique

Hello,

"Parse plugins tags" parameter is used to enable ability using content plugins in questions only.

Hello,

Sure, I understood that.

Can you make it work in 'Text Template' too ?
I am ok to share the effort and pay a part of that additional function.

Do you think it is possible ?
And if so how much would you like and when could this be done ?

Many thanks !
D

Hello !

I have just sent you one email to answer your connection issue, and another one regarding the 'sharing extender'.

If you need any more info, please let me know of course.

Many thanks to you,
D

:silly: :)
Many thanks for solving my problem on this !
Very appreciated.

Best
D.

Hello,

i'm interested in exactly the same feature (lock until a share). Is there a solution or custom programming for that?

Thanks Atexo

Hello,

DomJam uses "social lock" 3rd party extension for this purpose.

Hello,

thanks for the extension name. And this extensions code ("{{josociallocker}} Content {{/josociallocker}}") can be parsed in the text results?

Atexo

The extension doesn't support ability to use content plugins in text templates. It requires modification of the extension.

Hello,

modification of your or of 3rd party extension? If it's on your side, is a custom programming possible?

Atexo
