Error Joomla 3 after installing :

Posted by Maxim Besters - 2015/05/23 20:51

_____

Unfortunately I got the error message as pasted below at my site: http://www.nws.contexxt.nl/

the message prints directly on the frontpage. I've tested several quiz applications and the ari soft plugin simply most suited my needs. I really need the plugin to work bu I really don't know where to trouwbleshoot/solve the issue...? Would anyone please be so kind to help me? Thanks in advance. (for troubleshoot reasons: i did not uninstall ariquiz: the problem displays right on the first page when you enter my url.... With regards, Maxim Besters

ERROR MESSAGE:

Deprecated: Non-static method AriKernel::import() should not be called statically, assuming $this from incompatible context in /var/www/vhosts/36/200439/webspace/httpdocs/nws.contexxt.nl/plugins/system/ariquizanywhere/ariquizanywhere.php on line 58

_____

Hello,

We have sent the updated "ARI Quiz Anywhere" plugin by email.

Regards,
ARI Soft

_____

I'm Sorry to inform: the problem still persists? i've uploaded and installed the version you send me by mail but I recieve the same errors?

can I send you a private mail with my login details and could you please contact me for a (custom made) addition to the quiz?

We would like to have a

- free text question with the possibility to add grades later by the teacher;
- a hotspot question with more hotspots (able to 'map' masks or alpha channels?)
- grading in numbers in addition to percents....

our site: www.nws.contexxt.nl

thanks in advance

_____

Hello,

Currently we see another error message on your site. Could you provide a temporary access to your J! backend by email so we can update the plugin and check it on your site?

Regards,
ARI Soft
