
Retrieving more information than Name and Email

Posted by eSilverStrike - 2015/06/10 13:45

This goes for Guest users and Logged in users.

We would like to collect more information about the user taking the quiz. Is there a way to add extra fields so we can have the user give us their age, school, etc... along with the name and email?

This would have to be configurable depending on the quiz. Would the only way to do this is add in extra quiz questions with points of zero? (I rather keep it separate from the actual quiz questions (since they list question numbers, etc...))

Thanks

Hello,

The extension can show a form with name and email fields on quiz description page for guest users. You can see demo here. An XML file can be edited to extended this form, but the extension doesn't support ability to use different forms for different quizzes.

Thanks that is good to know. Will the extra data be stored in the database then and show up in the results? (or at least accessible somehow in the admin)

Maybe in a future version you will allow for this type of functionality where quizzes can have extra information fields for guest and logged in users.

These data are stored in a database and can be used in text templates.

Re:Retrieving more information than Name and Email

Posted by admin - 2015/09/26 09:01

Hello,

See /components/com_arquiz/models/forms/quizform/guestform.xml file. Extra fields can be added to text templates:

{ExtraData:PARAM_NAME}

Where PARAM_NAME is name of extra field. For example {ExtraData:Email}

Okay I have added in an extra field called City.

Looking at the database I can see it is stored in ariquiz_statistics_extradata. The problem is that this extra data doesn't seem to get exported nor does it show up in the Quizzes Results table. I need for this data to show up in the exported data (at least). Is this possible?

Also I noticed a bug.

I have deleted all my quiz results for all quizzes and the table ariquiz_statistics_extradata still contains a pile of records. Shouldn't these records get deleted along with the rest of the quiz results.

Thanks

Hello,

Extra data can be shown in text template. For this use {\$ExtraData:PARAM_NAME} predefined variable.

Thank you for your report about the bug. We will check it and fix in the next version.

Extra data are deleted fine when quizzes results are deleted. We checked it in "ARI Quiz" v. 3.8.4

I thought the latest version was 3.8.3 which I have installed. I didn't see an announcement for 3.8.4. Did you send out an email?

Where is the changelog and what was fixed or updated in 3.8.4?

I have a modification with my 3.8.3 version which ari soft gave me which added new abilities to the quiz export.

Thanks

Re:Retrieving more information than Name and Email

Posted by BurlingtonGreen - 2016/01/29 12:13

SO I currently have 4 quizzes with questions and question categoriesm etc.. (I still have 3.8.3 installed until you answer the above question) but I have deleted all quiz results.

The following tables

ariquizstatistics
ariquizstatisticsinfo
ariquizstatistics_pages

still have many records in them. Is it okay that I delete these records (I will be using phpmyadmin)?

Thanks

Re:Retrieving more information than Name and Email

Posted by admin - 2016/01/29 15:15

v. 3.8.4 supports ability to show "Try again" button at the end of a quiz.

The tables also contain information about not finished quiz sessions. You can check value of "Status" field in

ariquizstatisticsinfo table.

Re:Retrieving more information than Name and Email

Posted by BurlingtonGreen - 2016/01/29 15:36

In 3.8.4 did you add the feature we talked about here

<http://www.ari-soft.com/ARI-Quiz/53469-Export-results-quizzes-questions-and-answers.html>

which allows exporting of the quiz results? You gave me a file that I updated my 3.8.3 version with. If 3.8.4 doesn't contain this update then my clients will not want to update to 3.8.4.

Thanks

=====

Re:Retrieving more information than Name and Email

Posted by admin - 2016/01/30 12:27

v. 3.8.4 doesn't contain this feature.

Re:Retrieving more information than Name and Email

Posted by BurlingtonGreen - 2016/01/31 16:08

Okay I will hold off upgrading then.

Will the next version contain the export update?

Roughly when will it be released?

Thanks

Posted by admin - 2016/01/31 17:42

We wrote that we included this feature in "ARI Quiz" v.4.x, not in "ARI Quiz" 3.x. Currently we don't have an exact date when it is available.
