
Can the user view his past results in a list?

Posted by eSilverStrike - 2015/06/11 16:04

Your features mention

- can display user quizzes results and activities in JomSocial user profile with help JomSocial plugins
- can show user quizzes results in Community Builder user profile with help ARI Quiz Results plugin for Community Builder

I don't have any of these installed (and I don't want to install them)

Does ARI Quiz itself allow the user to view a summary list of his quiz results (along with the actual results of the quiz)?
We would like our users to be able to view and compare their past results?

Thanks

Tom

Hello,

Registered users can see own results for all completed quizzes. You can see it here (login before open this link).

Regards,
ARI Soft
