
Quiz Themes

Posted by eSilverStrike - 2015/06/14 16:57

I see you can change the quiz template in the config. Are there any other templates beside the default?

Also I don't suppose we can change the template on a per quiz basis? We may want some of our quizzes may have a different look and feel from the others.

Thanks

Tom

Hello,

The extension contains only one template. Tutorial how to create new themes is available [here](#).

Currently theme is selected only on config page, but we can add ability to override template in menu item settings/quiz settings.

Regards,
ARI Soft
