Need Help with Question Categories Posted by albeck - 2015/06/21 15:01
Hi.
I have four subjects which I have created as Quiz Categories (Maths, English, Science and Social Studies). I will then create several quizzes for each category (Maths Quiz 1, Maths Quiz 2 etc). Within the Math quizzes, I will have 50 questions from various topics e.g. Fractions, Algebra and so on. What is the best way to represent the topics? Can the be stored as Question Categories?
How do I show reports based on the topics?
Thanks Albeck

Hello,
Question categories can be used to separate questions by categories inside a quiz. The extension can show results per each question category at the end of a quiz, for this use {\$SummaryByCategories} variable in a text template.
Regards, ARI Soft
