## Internal Server Error 500 - Showing detailed resul

Posted by mike\_dcx - 2015/06/30 20:47

---

Hi everybody, i need your help.

My ariquiz components works really good, but when i active the "Show detailed results" and finished a quiz the Internal Server Error 500 appear!!

In my log file don't have something about the component!!

Thanks for the support... <http://www.ari-soft.com/images/fbfiles/images/error500.png>

Hello,

Do you use the latest version of the extension (3.8.3)? Could you provide a temporary access to your J! backend by email and a link to a page where the problem occurs so we can investigate it?

Regards,  
ARI Soft

Hi, i use the latest version (3.8.3), i can't give you acces because is an intranet webpage. I used Joomla 2.5.28, (yes i know, but is the server assigned to the proyect for 3 years ago) ... T\_T ... and nop.... no server updates!!

Can be folder permissions the problem?? .. because.. everything works fine!

Check web server error log or configure it to show errors into a browser.
