How to customize text template result?

Posted by zippomaker - 2015/07/08 14:33

_____

Hi, We would like to add message to user (into text template) for different numbers of correct answers, example:

3/10 correct answer: message = LOW LEVEL!!!
8/10 correct answer: message = YOU ARE A CHAMPION!!!

..and also add a sound for 10/10 answersâ€¦

Thanks

regards

_____

Hello,

Result scales can be used to show different text (mail, print, certificate) templates based on number of earned score. Result scales can be created on "ARI Quiz -> Results scales" page and selected in quiz settings, see "Results settings -> Choose template type -> Result scale" parameter.

Regards,
ARI Soft
