
Show used time in Top Results module

Posted by Peternicolaj - 2015/07/08 18:19

Hi there,

My quiz is based on score and time used. I would like to show this in the Top results module, so user can see both score and time used. Now they only see the score.

Is there a way to show time used in the module also?

Hello,

This feature can be implemented as a custom development.

Sorry, its the lite version.

Will it be a possibility to show the use time with that?

The module uses data which is returned by "getTopResults" method from /administrator/components/com_arquillite/kernel/Controllers/class.ResultController.php file. You can modify module layout in /modules/mod_arquiztopresult/mod_arquiztopresult.php file.

Still trying to get this to work. Any suggestions?

Got the UsedTime from the ClassResultController.php, but where can i place it.

```
function getTopResults($count = 5)
{
$query = sprintf('SELECT U.name AS UserName, QSI.UserScore, Q.QuizName, (MAX(QSI.UserScore / QSI.MaxScore)
* 100) AS PercentScore' .
' FROM #__ariquizstatisticsinfo QSI INNER JOIN #__ariquiz Q' .
' ON QSI.QuizId = Q.QuizId' .
' INNER JOIN #__users U' .
' ON QSI.UserId = U.id' .
' WHERE QSI.UserId > 0 AND QSI.Status = "Finished" AND Q.Status = %d' .
' GROUP BY UserName' .
' ORDER BY QSI.UserScore DESC' .
' LIMIT 0,%d',
ARI_QUIZ_STATUS_ACTIVE, $count);
$this->_db->setQuery($query);
$results = $this->_db->loadObjectList();
if ($this->_db->getErrorNum())
{
//trigger_error('ARI: Couldnt get top user result list.', E_USER_ERROR);
return null;
}

return $results;
}
```

It's ok. Just hoped that another user had a solution.

The component is not usefull, if the users can't see how much time they spent, so better try find another.
