# can i change the opacity in solution of hot spotQ
Posted by atexo - 2015/07/16 18:23
_____

Hi,

It's the first time I'm using the hotspot question. Everthing works fine. However, the opacity of the correct field in the result/solution area is not really distinguishable from the remaining (incorrect) fields. Therefore i wanted to add a border to the correct solution. I analyzed the field with firebug and for me it seems that there is no correspondondig CCS class for this field, where i can add my needs. Can you please help me in this regard.

Thanks in advance
Atexo

_____

Hello,

Use the following CSS rule:

.aq-question-correct-answer .aq-hotspot-wrap>DIV:first-child,
.aq-question-explanation .aq-hotspot-wrap>DIV:first-child {background-color: #CCC !important;opacity:0.8 !important;}

Regards,
ARI Soft

Thanks for the quick reply (as always!). Exactly what i needet. Works perfectly!
Just two remarks: The right side of the "correct" area always seems to be a bit more right than defined in the question.
The bottom line is always missed (maybe because of the same reason). i attached an image.

Thanx Atexo

_____

Could you send a link to a quiz results page where the problem occurs?

Regards,
ARI Soft
