## Quiz as poll

Posted by musqsim - 2015/07/20 17:43

---

Hi there! I've just started to use Ari Quizz and I have some Questions about it.

Does anyone knows how to make a Question but in Poll format? A simple question, but with no correct answer and in the end, user can see results...

Thanks in advance!

Hello,

Could you specify what do you want to show at the end of a quiz (some text or something another)?

Regards,  
ARI Soft

Hi thanks for quick reply!

What I want is that is not wrong answers and if possible show all results from all users at the end and a text message that can be done in Template, I guess.

How can I make possible only one attempt per user? Only registered users will see quizzes.

And How can I make 2 or more questions per Quiz? I have 2 Quizzes, one that i want as Poll, and other with 2 questions. If I click on Quiz Questions, I see 2 questions, one with a correct answer and other with just Yes or No and with no correct answer.

but if I go to quiz in front end, in that quiz I can only see the first one...

Thanks and sorry, I'm noob at Ari Quiz...

Hello,

It is possible to show different text templates at the end of a quiz. For example one when the quiz is failed and another if the quiz is passed successfully. See "Results settings -> Failed template" and "Results settings -> Successful template" parameters in quiz settings. Text templates are created on "ARI Quiz -> Text templates" pages. It is also possible to show different text templates based on number of earned score, result scales are used for this purpose.

The extension doesn't support ability to create questions without correct answer. You can choose any answer as correct answer and hide detailed results at the end of a quiz. Set "Results settings -> Show detailed results" parameter to "Never" in quiz settings.

Complete (or terminate) previous quiz session and start a new one to see new questions.
