
New page after quiz

Posted by BevStone - 2015/07/27 23:02

How can I go to a new page after completion of the quiz. I don't want results page but a page where I can thank then for taking the quiz and tell them they will receive an email with further instructions.

Thanks!
Bev

Hello,

If you want to hide questions with answers on quiz results page, set "Results settings -> Show detailed results" parameter to "Never" in quiz settings. It is possible to show different content at the end of a quiz if the quiz is successfully passed or failed or based on number of earned score. For this see "Results settings -> Successful template" and "Results settings -> Failed template" parameters. Text templates can be created on "ARI Quiz -> Text Templates" page.

We can also send a plugin which supports ability to define redirect URL which will be used to redirect a user at the end of selected quiz.

Regards,
ARI Soft

The plugin would be good as this site will be in several languages. That would probably save me a bit of time.

Thanks!

Thanks! I installed it. Do I have to do something after installation? I am seeing no quizzes when I go to select a quiz.

It doesn't require any additional actions. It can be a conflict with 3rd party extension. Could you provide a temporary access to your J! backend by email so we can check it?

Hello,

Clean browser's cache and open plugin settings page again.
