
Change quiz button text

Posted by jlb4350 - 2015/08/11 13:01

Hi, some of my users are complaining that they don't know how to go to the next question in a quiz. The button to proceed is labeled "Save". Is there any way to change this button's text to something like "Submit"? If I have to change something in the html or css, I'm familiar enough to do that...i just don't know where to look.

Also, the labels on the quiz buttons are not consistent with the labels in the quiz configuration. For example, when you enable the "Skip" and "Previous" buttons, the labels on the buttons on the front end show as "Next" and "Back". This is a bit confusing.

I would rather see the "Save" button changed to "Next", "Back" changed to "Previous", and "Next" changed to "Skip". If there is a way for me to change these in the config files, please let me know.

Thank you.

Nevermind, I found it. All the button labels are in `/language/en-GB/en-GB.com_ariquiz.ini`

Thank you
