
Access Level after Quiz Completion

Posted by woodworker - 2015/09/12 18:47

I have set the required access for a quiz to "Registered". Now, upon successful completion of the quiz, I want their access level changed to "Certified". (I have already created the custom level "Certified".)

Is there something in ARI Quiz that will accomplish changing the access level? Or, can I create a plugin which would be triggered by successful quiz completion?

Thank you for the information!

Don

Hello,

We can create a custom plugin which will assign a user to the selected user group when a quiz is completed. If you are interested in it, we can discuss details by email.

Regards,
ARI Soft
