
About License Key

Posted by waleed - 2008/11/30 19:03

I noticed that the license key " product license " has an end date .. is it mean that after that date I should purchase a new license ?

No. After the end date the component will continue working without a problem. Here is an extract from our F.A.Q.:

"Full license key means that you will receive free updates for the product for a year after purchase. After a year the product will continue working but you will not receive any updates. If you wish to prolong the license this costs half of product price/year.

Licenses work for one domain only. If you want to use the product on another domain you need additional purchase for that."

Please let us know if you have questions.

Hi,

I have just purchased ARI Quiz component and would like to know whether i can use the testing license key for the local system which is not connected to the internet. Since we want to test the component locally before uploading it on the server.

Thanks in advance,
Deshpande.

Sure. Just generate temporary license key for localhost. When you are ready to go online you should generate full license key for your production domain.

Temporary license key will be used on the localhost to test. What do we do if we need to test on the main website before deploying the component with the production key?

Can we use the same temporary license key at both places?

Hello,

Please contact us by email and provide us your production domain name when you are ready to test on production site. We will send you temporary license key for this domain then.

Regards,
ARI Soft
