Adapting the page that shows all quizzes
Posted by The Cheadle Academy - 2015/10/05 10:13

_____

Hi,

I love the ARI Quiz package and it really works well. However one thing I would like to do and I am not sure how to do it, or if it is even possible, is to adapt the layout of the page that shows all the quizzes.

At the moment the default is just a list of the different quizzes, under the category sub headings, however would it be possible to adapt this page so that I could place some text above this list, just explaining that users need to log in before taking a quiz?

_____

Hello,

If you want to add some text, modify /components/com_ariquiz/views/quizzes/tmpl/default.php template file.

Regards,
ARI Soft

_____

Maybe this is a really silly question but if I want text to go above the list of quizzes, where would I put this in the code?

This is the code I am seeing in this document.
