
passed score calculation not working

Posted by kendulah - 2015/10/08 10:52

Hi,

I encounter a problem that has been described in other threads around the passed score calculation. My quiz has 22 questions and I set the passed score to 90, see attachÃ© zip file

Unfortunately all results show as 'passed' even with a much lower score, see image below.

I downloaded the component yesterday, so I should have the latest version. Joomla version is 3.4.4. Language is de-DE

Thanks in advance for your help

Hello,

Could you provide a temporary access to your J! backend by email and specify some quiz results which have the problem so we can investigate the problem? We need to see quiz settings and check previous quiz settings.

Regards,
ARI Soft
