
Ari Quiz

Posted by dashbaugh6025 - 2010/07/20 22:25

Hi,

I have an assessment that I am trying to create with Ari Quiz. I need to add categories of questions. Instead of "point" totals I need to be able to add types of categories. I can't identify how to use current version to accomplish this task. Can you customize this program to meet this need? I am sending the assessment so you can see what I am trying to accomplish.

I like the product very much. It would be nice to customize. If you can customize what would the cost be?

Thank you
david

Hello,

Could you explain your requirement? Do you want to display score for each question categories?

Regards,
ARI Soft

Hi,

I appreciate the response. I have sent a copy of the "hard" assessment to the info e-mail address.

I think that will provide the information for what I am trying to accomplish.

I have 4 questions that are situations. The person taking the assessment will answer the question with all 5 answers. The answers will be in order of how they would most likely provide a solution to how they would least likely handle a problem. All of the answers represent a type of response.

It would be great for you to evaluate the "hard" copy and see if you have a custom solution.
Thank you
Davd

Hello,

If we correctly understand, you need the same functionality like in this post?

Regards,
ARI Soft

unfortunately for me that is very close to what I need. I also read the response. Can you customize it or refer me to someone who can?

Sorry, but we can discuss implementation of this feature not early than 1.5 month.

Regards,
ARI Soft

I appreciate it that you will consider creating the customization. The time of 1.5 month is great. It will be great to have that feature in the future.

Let me know what you need from me to proceed.

Thank you
David
