
Ari Quiz

Posted by dcasmr - 2008/07/13 01:07

Hi there,

1. Is it possible to associate a picture to each question in Ari Quiz?
For example a map, etc?

2. If I was to type Math Symbols, do I import gif/jpeg or does it support some Math extensions?

3. Do you have a timer associated with a Question? Can it be done?
Say set it to one minute or two, counting down.

4. You have buttons such as Save, etc. I suppose that it can be translated into another language-

Thanks,
dcasmr

Hello,

1. Yes, you can associate a picture with each question - WYSIWYG editor is used for this.

2. If your Math Symbols are in unicode so there is no problem since the component supports UTF-8. If not, you should
you the pictures for this. Also if WYSIWYG editor in your Joomla! system supports Math Symbols you can you it.

3. Yes, you can set time for quiz and for question.

4. Yes, you can translate all the text resources to any language you want using handy back-end page. Here is the
example on our demo site: http://demo2.ari-soft.com/administrator/index.php?option=com_ariquiz&task=lang_frontend

Right now the component comes with English, German and Russian translations.

Regards,
ARI Soft
