
Default score for questions

Posted by sochart - 2015/11/04 17:49

Hi guys,

I need to change the score to "1" for every single question I add to the quizz.

Is there a way to store default settings like a score or randomize checkbox to a question type ?.

Thanks a lot.

Hello,

Open quiz questions page, select questions which you want to modify with help of checkboxes, click "Mass edit" button, set "Score" parameter to 1 and click "Apply" button.

Regards,
ARI Soft
