
Sort question

Posted by sochart - 2015/11/04 19:34

Hi,
is there a way to have a kind of "sort question" ?.
You have to sort the answers in a logical way by drag and drop or entering a number

Hello,

Currently it is possible to change questions order if use arrow buttons in "Order" column.

Regards,
ARI Soft

I second that. To use the arrows is OK if you want to, say, move one question one, two..places up or down. But what if you need to move a whole Category A (containing 30 Qs) under/after a Category B (see the picture enclosed). As I understand it, now i need to move every single question individually clicking on the up(down) arrow roughly 20 times? Sounds like a really daunting task. It would be nice to have an option to move/sort/organize questions in bulk (similar to mass edit) or at least to be able to order question categories using the up/down arrow. Id love to be corrected that there is such an option, but I haven't found it yet. It would make the process of organizing quiz questions/categories much easier and straightforward. Thank you. <http://www.ari-soft.com/images/fbfiles/images/qs1.jpg>

Hello

Drag'n'Drop ordering for questions and question categories will be available in a future version of the extension.
