## protect quiz with password

Is it possible to protect a quiz with a password?

I need it for a game which I develop within joomla

Problem to solve: The user may only open the quiz if he/she has a password (which he/she won in an earlier quiz)

The option "you can pass this quiz if you have finished the other quiz" is not an option, because the user can win the password by different ways.

Hello,

Can implement this feature as a custom development. We can discuss details by email.
