User being able to download quiz answers as a pdf?
Posted by The Cheadle Academy - 2015/11/12 15:49

_____

Hi,

Not sure if this is possible, however it would be possible for the user at the end of the quiz to have access to their quiz attempt and the answers that they submitted for each question? I know that I can do this from the admin console for each attempt, however it would be handy to give this feature to the end user.

Or is their any way that if they click on the link in the module for their previous quiz attempts, that they can be taken to their past quiz results to review their performance? Currently just clicking a quiz title link will take them to a new attempt at the quiz in question.

_____

Hello,

Registered users can see all previous quizzes results. For this create a menu item with type "ARI Quiz -> Quizzes results".

Regards,
ARI Soft

Thanks for that reply. I would use that as it works really well when the user is logged in to the site, however when they are not logged in to the site it appears to just throw up an error, suggesting it has too many loops?

Can it not be set so that it goes to the page, however I can add some text saying that the user needs to be logged into to view their test results?

Ive attached a screen shot of what I am seeing, when clicking then menu item when the user isnt logged in.

We can't reproduce this problem. Do you use the latest version of the extension (3.8.4)?

_____

Yes this is the latest version that I am using.

The only fix I have found for the moment is removing the menu option for general users and then enabling it for registered users only. However in an ideal world it would be nice to have it there all the time so people get used to it.

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem?
