
How to apply points correction and essay question

Posted by sochart - 2015/11/18 19:49

Hi,

1) Is there an easy way to change points on a quiz result ?
I've made mistakes on choosing the right answer in a quiz and students have answered correctly but they have no point.
I need to correct the points.

2) Is there a way to have an essay question with points ?
It could be related to the previous question.
I understand that essay can not be automatically evaluated but if I could apply points afterward and export evaluations with correct points, it would be fantastic.

Thanks

=====

Hello,

1. The extension doesn't support this ability.
2. This feature can be implemented as a custom development.

Regards,
ARI Soft
