
quizzes results

Posted by Marsm - 2015/11/20 22:17

Hello,

I accidentally pressed the delete all button in stead of the delete button when I selected some quizzes in the quiz results page in the backend. So now all the quiz results of all my users are gone. :(

Fortunately I just made a backup of my site, so I have a backup of the complete database including all ariquiz databases.

Can you tell me wich databases I have to replace to get all the quiz resuts back?
(I think the _ariquizstatistics databases)?

Or is there another way?

Thanks,
Marsm

Hello,

See the following tables:

#__ariquizstatisticsinfo
#__ariquizstatistics
#__ariquizstatistics_pages
#__ariquizstatistics_files
#__ariquiz_statistics_extradata

Regards,
ARI Soft

Hello,

problem solved. Thanks a lot for the quick answer.

Regards
Marsm
