Specific Question type in ARI Quiz
Posted by denis - 2015/12/03 05:54

_____

Hi, can you please help me?
I added to ARI Quiz new specific question type with my specific fields.

In Admin panel all is working good for me and all data saved in DB.
But when I created a new Quiz with my question type and try to test it on frontend part, I have a next js error "Cannot read property 'questionId' of null". I think a problem in function "ajaxGetPage", but when I check $ret object I see all my data is correct and I see 'questionId' variable and it's a not null.

I added new question type on DB in "ariquizquestiontype" table and I added new class in kernel/Application/ARIQuiz/Questons/Types folder.

Regards, Denis.
