
share result on Facebook, Google and Twitter

Posted by brusamolino - 2015/12/05 22:38

Hi

I have a problem with share the result form my quiz

I have a quiz with result scales

2 points = bad

6 points = good

8 points = Excellent

On Config->Social sharing i can customize the message to share... but when i try to share the result i have only the total of points but not the Title (bad, good, excellent).

How can i have it?

thanks

Luca

Hello,

It is not possible to use templates from result scale in "Config -> Social sharing -> Message" parameter.

We are going to extend social sharing functionality in a future version of the extension.

Hi

Thanks for your reply

Can you tell me when we will have this feature?

I have a problem ti share with Google plus.... When i try the post is blank ?

Why?

Thanks Luca

1. We suppose it will be ready within a month.

2. Could you provide a link to a quiz where the problem with Google+ occurs?

Regards,

ARI Soft

Hi

I've put the websit online
the link is <https://www.mpscookingfactor.it/sei-abile-in-cucina-quiz-mps-cooking-factor>

Can you tell me when you have seen it so i can put offline?

Best regards

Luca

Google+ API supports ability to send only URL of page which want to share. It doesn't support ability to set default comment.

I already configure in Config >> sosial share, also i setting up in Result setting in Quiz to enable to share.
but every i complete quiz share button is not display..

can you tell me something how to enable share button
