Upgrade from Joomla 2.5 to Joomla 3 Posted by niki - 2016/01/06 18:20
Hi, Can you tell me how to transfer my DB files from Joomla 2.5 Ari Quiz installation to Joomla 3 Ari QUiz installation? What are the steps?
I have to install first Ari Qiuz on the new website and then import the DB files or i have to import the files first?
Re:Upgrade from Joomla 2.5 to Joomla 3 Posted by admin - 2016/01/06 18:31
Hello,
Copy all tables with "ariquiz" prefix from J! 2.5 to J! 3.x database (don't forget to change tables prefix if necessary) and then install the component on J! 3.x site.

Do i have to upgrade Ari Quiz on the old Joomla 2.5 website?
Re:Upgrade from Joomla 2.5 to Joomla 3 Posted by admin - 2016/01/06 18:35
It is not necessary.

Execute the following SQL query after restore data from dump but before installing the component:
DELETE SI,S FROM kxmk_ariquizstatisticsinfo SI LEFT JOIN kxmk_ariquizstatistics S ON SI.StatisticsInfold = S.StatisticsInfold WHERE SI.StatisticsInfold IN (686)
It can be executed in AceSQL component or via PHPMyAdmin. It should help.
