
Question about upgrade

Posted by niki - 2016/01/14 18:45

I have this crazy question. We have to upgrade from Joomla 2.5 to Joomla 3 and we have Ari Quiz 2. So we have some custome work inside this files

class.ResultController.php
quiz_finished.html.php
quiz_finished.php

And now in ARI Quiz v. 3.8.4 i don't see this files... What are the names for this files now in the new Ari Quiz 3 ? Did you change the names or you move them?

Hello,

Structure of "ARI Quiz" v. 3.x differs form "ARI Quiz" v. 2.x. It was totally re-written. Template files for frontend part are located in /components/com_ariquiz/views/ folder. Models are located /administrator/components/com_ariquiz/models/ folder.

Regards,
ARI Soft
