
Title in result scales to share

Posted by brusamolino - 2016/01/16 12:07

Hi
i've a question
At the end of a quiz i have, for example, this summary:

Con un punteggio di 3 su 8
Sei un aiutante cuoco

where 3 is \$UserScore
8 is \$MaxScore

but can you tell me what is "aiutante cuoco"?

Because i'de like to have in SOCIAL SHARING this:

{ \$QuizName}
Il giorno { \$StartDate} hai partecipato al quiz di MPS Cooking Factor e sei passato con { \$UserScore|number_format}
punti su { \$MaxScore|number_format}.
Sei risultato un (here i have to put the title of that score; it is different for different score)

thanks
Luca

Hello,

Message which will used for sharing results via social networks is specific on "ARI Quiz -> Config -> Social sharing" page.

Hi
yes i know that i can set the message on ARI Quiz -> Config -> Social sharing" page.

But if in the result page appear this value (the title of this score), is not possible to add it in the message for social share?

Thanks Luca

It is not possible to use different templates based on number of earned score like for result scales.

Maybe my english is not so good

When i complete a quiz i have a result page where i have a page with some variables/parameters that compose the message:

UserScore that display in the message the user score

MaxScore that display in the message the max score for that quiz

and a variable that display the title about user score

the same variables/parameters i can use them on ARI Quiz -> Config -> Social sharing" page

Can i use the parameter that in result page display the title even in social share message?

Is very important for me have this parameter on social share message

Thanks Luca

Could you specify name of variable which you use in text template and can't use in "Social message" parameter?

Regards,
ARI Soft

hi
sorry but i don't know which parameter is it

When i have completed a quiz i have the result like the file in attach where the parameters are rendered with the value

Userscore is 1

MaxScore in this quiz is 8

and then the title "lavapiatti"; it is the title of the text template that i have associated at this score <http://www.ari-soft.com/images/fbfiles/images/screen-cd4affaf80b68a7b415da66577bf53cb.jpg>

It is not possible to include a text template into "Social message" parameter.

Bad news :-(

there isn't any solution to include the title?

We can add a custom parameter to quiz settings which will be used to define "Social message". If you are interested in it, we can discuss details by email.
