## Change the generated PDF Certificate

Posted by niki - 2016/01/18 22:38

---

I know i ask this question probably before but here we go :)

I want to change the PDF certificate with the template i have. The template is picture and i have the Date of the person taking the quiz, the generated ID of the quiz and the Name of the user taking the quiz. Is there any easy way this can be done?

=====

Hello,

Open "Text templates" page on component backend and edit template which is used for PDF certificate.

So can you tell me exactly how i can put picture to be generate in PDF with all the Parameters inside?

{UserName}  
{QuizName}  
{EndDate}

=====

---

I don't use any code that's why i'm asking you.

I have a JPEG photo of our Certificate. I want to generate this photo in PDF with Ari quiz. I want to use your Parameters inside my photo in specific places. I have create the photo this way:

NAME {UserName}

Name of the QUIZ {QuizName}

DATE {EndDate}  
ID

---

I hope is clear now

Use absolute (or relative) positions for text elements. HTML code will look like:

```
{@doc_format:landscape}
```

```
{ $UserName }
```

I did everything you told me. I make the code I put the photo of the certificate but when i generate the certificate is broken. Can you tell me which pdf generator ari quiz is using? Where i can change the settings for that?

This is the code i'm using:

{ \$UserName}  
{ \$QuizName}  
{ \$EndDate}  
{ \$StatisticsInfold}000

and my certificate.jpg is 2500 x 3300 px

I can send you the pdf ari quiz is generating on PM

The extension uses DOM PDF library and it doesn't support background-size CSS property. Resize the image to 814x1055 size and use the following HTML code for the template:

```
{ @doc_format:portrait}  
@page { margin: 0px; }
```

```
{ $UserName}  
{ $QuizName}  
{ $EndDate}  
{ $StatisticsInfold}000
```

Last question:

{EndDate} is coming with the hours and seconds. How to remove this from the result? I want only the date: 06-19-2016

Right now it's generating something like this: 06-19-2016 14:40:40

=====

## Re:Change the generated PDF Certificate

Posted by admin - 2016/06/19 12:19

---

Use the following code:

```
{EndDate|date_format:m-d-Y}
```

We just saw we have problem with that code. The names are different positions on all the certificates. For example one name is 2 words other one are 4 so the name are align always to the left... Can you tell me how to make the name center?

```
{UserName}  
{QuizName}  
to be center
```

---

I try changing the left to center but is not working

Thanks

---

Use:

{UserName}

instead of:

{UserName}

Hello Dear Admin, I want to set page margins to 0 when generating PDF by adding this line of code to the template:  
@page { margin: 0px; }

But it the editor always omits this code. How to I manage it?

Hello,

Open "Site -> Global Configuration" page on Joomla! backend then open "Text Filters" tab. For the Super Users group (or other user group(s) set "Filter Type" to "No Filtering".

Regards,  
ARI Soft

---

It is a problem with WYSIWYG editor settings. We disabled WYSIWYG editor in "ARI Quiz" settings (see "ARI Quiz -> Config -> Main settings -> Editor" parameter) and the code is saved fine.
