Hello,  
  
"ARI Quiz" package contains "ARI Quiz Anywhere" plugin which supports ability to embed quizzes into articles.

When the extension is installed, it possible to select which addons will be installed. Install "System - ARI Quiz Anywhere" plugin then open plugin settings page, configure it and enable. After this possible to use the following plugin code into articles (or other content):

```
{ariquizanywhere quizId="QUIZ_ID" scrolling="no"}{/ariquizanywhere}
```

Where quizId is ID of quiz which want to embed.
